

CABOT 750 RIG INFORMATION

Entrepose Drilling Cabot 750 is a highly mobile, self propelled drilling rig. The rig has been entirely refurbished in 2013. Highly reliable, the Cabot 750 has drilled numerous oil and gas exploration and development wells in Europe and North Africa.

Due to the limited number of loads the Cabot 750 can be efficiently mobilized and operated in remote areas for drilling or workover projects.

CABOT 750 RIG INFORMATION

MAST

Type	FRANKS CABOT
Height	max. 34 m from ground
Max. Hook Load	135 metric tonnes

SUBSTRUCTURE

Type	FRANKS CABOT "swing up"
Casing Load	159 metric tonnes
Set back load	90 metric tonnes
Drill Floor Height	6,6 m
BOP clearance	4,6 m

RIG POWER SYSTEM

Engines	2 x CAT 3412 TT
Generator	2 x CAT SR4 440 kVA 480 V
Prime movers	2 x GM 8V-71 710 HP

BLOW OUT PREVENTION EQUIPMENT

Annular BOP	13 5/8" 3000 psi
	11" 5000 psi
Ram BOP	13 5/8" 3000 psi double
	11" 5000 psi double
Manifold	3" 5000 psi

MUD PUMPS

Type (triplex)	2 x GARDNER DENVER PZ8
Max Input Power	2 x 750 HP
Max Flow Rate	2 x 2195 l/min

MUD SYSTEM

Active Tanks	44 m3
Reserve Tank	60 m3
Water Tank	50 m3
Agitators, Mixing skid with hoopers, Mud gas separator & vacuum degasser.	

SOLID CONTROL SYSTEM

Type shakers	3 x Swaco Mongoose PT
Mud Cleaner	1 x Swaco

ADDITIONAL EQUIPMENT

1800 m 5" DP G105
1800 m 3 1/2" DP G105
Gas flare, boilers
Offices, crew cabins, workshops etc.
Compressor unit, diesel fuel tank
Surface eqpt (fire fighting, HP cleaning etc.)
Forklifts
